*New Product For Nighttime Roadway Safety  
For The Towing & Trucking Industry  
"Helps To Protect You While In Traffic"*

Wear **ICE LIGHT** on your belt while you freely move around your vehicle at night or mount it to a standard traffic cone to set up a perimeter around a work area

The **ICE LIGHT** was designed for nighttime roadway safety. When worn on your belt it's brilliant color emitters of Amber and White help safely mark your presence to motorists up to a mile away. The **ICE LIGHT** has three user selectable light modes; the 1st mode - flashes Amber and White, the 2nd mode lights the White LEDs for constant illumination, and the 3rd mode lights the Amber LEDs for constant illumination.

The **ICE LIGHT** comes with a Nylon holster which attaches to your belt while you freely move around your vehicle at night. The **ICE LIGHT** can also be handheld for use as a traffic control device to warn drivers of an impending danger. An optional traffic cone adapter is also available which allows you to mount the **ICE LIGHT** onto a standard traffic cone to set up a perimeter around a work area. The belt holster also comes with a vehicle mounting kit so you can store the unit within the vehicle for easy and convenient access when it is not in use.

The **ICE LIGHT** operates continuously on a standard 9 volt alkaline battery for up to 16 hours and contains 17 SUPER FLUX Light Emitting Diodes "LED's" which have an expected life of more than 100,000 hours (equivalent to 10 years of use). **ICE LIGHT** has three user selectable light modes which rotate electronically in a 360° pattern offering maximum visibility. High intensity LED's at the tip can also be used when demanding the attention of individual drivers. **ICE LIGHT** also contains a low battery indicator which will notify you up to one hour prior to shutting off.

The **ICE LIGHT** is housed in a high impact plastic case with a non-slip rubber grip. **ICE LIGHT** is only 7.9 inches long and weighs only 6.6 ounces, it is water resistant and will float in water with the lighted side protruding upward.

## Applications:

### **AMBER ICE (Model #TE-1207A) - flashes Amber & White**

Can be activated in the belt holster and worn on your side to help indicate your presence at night;

- Truckers checking their Rigs, Tow Truck Personnel, Parcel Delivery Personnel, Roadside Construction Crews, Airport Tarmac Personnel
- Used for directing traffic; School crossing guards, Construction Sites, down traffic signal
- Use to indicate down power lines and utility cables or other dangerous conditions
- When mounted on a traffic cone with optional adapter it can be used to setup a visual perimeter around work crews or vehicles
- Can be used as a beacon when attached to large objects being hoisted at night
- Use to mark defective equipment so relief crews can quickly identify them when arriving on site

## Specifications:

- Made of High Impact ABS Plastic can withstand 6,800 Pounds Per Square Inch
- Alternating high intensity colored LED's in a 360° pattern
- Three user selectable light modes
- Water tight to 30 feet and will float with the lighted side up
- Lightweight weighs only 6.6 ounces with battery, and is only 7.9 inches long
